

THE BEST THING THAT CAN HAPPEN TO YOUR TEETH

Exceptional softness of
Nollex[®] bristles

Extremely effective
plaque cleaning

Ergonomics that ensure
effective cleaning

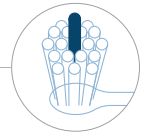

Exceptional durability
of bristles

Ensured cleaning at a
correct 45° angle

Exceptional teeth cleaning quality

Particularly effective cleaning

Thick bristles and oval-shaped head perfectly adapt to the curves of the jaw and the teeth, effectively cleans teeth, gum line and hard-to-reach places.

Gentle on enamel and gums

Extra thin, soft and rounded Nollex® bristles do not damage enamel and gums and protect them from excessive brush pressure.

No need to wet the toothbrush

Thanks to Nollex® technology, saliva is enough to wet the bristles, so the beneficial ingredients of the toothpaste are not diluted with water.

Exceptional softness and durability of bristles

Nollex® technology ensures unique softness of the bristles and maintains the same bristle quantity and shape from the first to the last cleaning.

High quality handle

The handle is made of high-quality PET plastic recommended by the World Health Organization - friendly to nature and people.

Ideal cleaning angle

The handle is designed to hold the brush at an ideal 45° angle without even knowing it.

Made in Switzerland

Especially high Swiss quality.

Toothbrushes for all smiles
